Summary

Passionate and detail-oriented Full Stack Developer skilled in building modern, responsive, and scalable web applications using React.js and FastAPI. Strong foundation in frontend development, backend API integration, and database management. Experienced in developing real-world projects with clean UI/UX, REST APIs, and responsive design principles. Quick learner with a strong problem-solving mindset and enthusiasm for building impactful digital products.

Education

🎓 Indus University

Computer Engineering

B.Tech • CGPA : 8.9

Ahmedabad • 2022-2026

Projects

🎯 CaféPOS – Café Order Management System

Tech Stack: React.js, FastAPI, MongoDB, Tailwind CSS, WebSocket, JWT

- Developed a full-stack POS system for cafés with real-time order tracking and payment management.
- Built responsive admin and staff dashboards using React.js and Tailwind CSS.
- Implemented FastAPI backend with JWT authentication, MongoDB integration, and REST APIs.
- Added WebSocket-based live updates, QR self-ordering, and real-time kitchen display features.

🎯 PG Finder – Full Stack Web Application

Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT

- Built a role-based PG Finder platform for searching, comparing, and booking PG accommodations.
- Developed responsive frontend UI using React.js and Tailwind CSS with filtering and dashboard features.
- Created secure REST APIs with JWT authentication and MongoDB database integration.
- Implemented owner/admin management modules for property handling and booking management.
